

Project Experience

7 Reasons To Choose Sound Planning...

We use professional products. Most contractors do. We take it one step further. We constantly evaluate the components we sell so that you don't end up with a wireless microphone that has a "difficult to use" on-off switch, or a mixer that has no expansion capability.

We are committed to excellence. Excellence is the standard for everything we do. From our initial meeting with the client, to designing the system, to schematic drawings, to completed installation, to training the operators, to servicing the system... We want you to be satisfied!

Our installers are professionals. Our installers are IBEW union journeymen. They are highly trained audio and video professionals with years of training and experience. They take a lot of pride in making sure that every system is properly installed.

We've been in business a long time. Since 1976 Sound Planning has specialized in the design and installation of state-of-the-art sound systems, acoustics, video systems, and stage lighting. We have hundreds of satisfied clients, and we hope that you will become one of them!

Our designs are state-of-the-art. We don't take chances when it comes to system design. We use state-of-the-art software (some of it proprietary) to assist us in designing and documenting your system. We want your project to be a complete success!

We are your "one stop" resource. Not only can we help you with your audio needs, we can also help you with your acoustics (did he say sixty or sixteen?), video, and stage lighting. These systems are all integrated to help you communicate your message more clearly.

We provide training. Training is everything. A trained operator can help your church service have a positive impact. An untrained operator can ruin it. In training your volunteers, we emphasize professionalism in the technology ministry. They are key to enhancing the worship experience.
