

T-Coil (Telecoil) Loop Systems

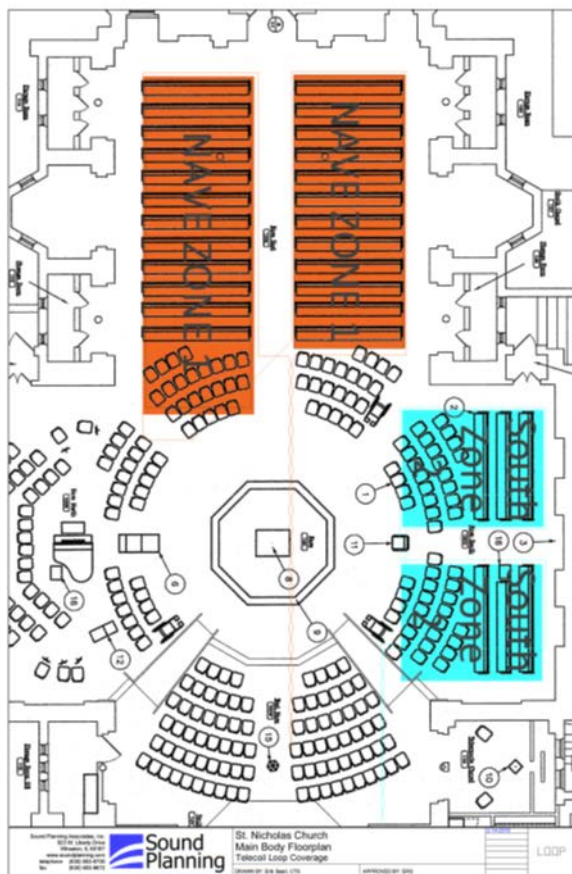

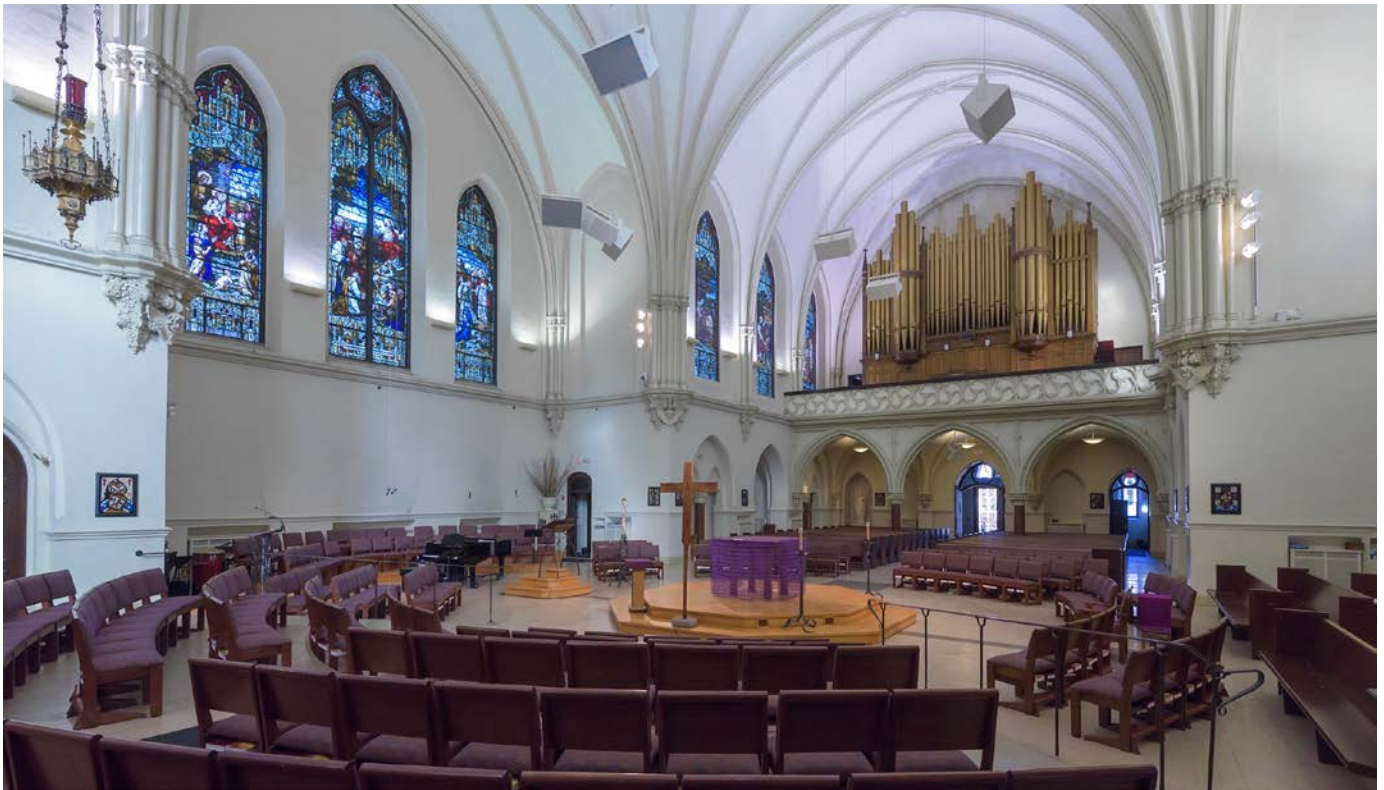

St. Paul the Apostle, Gurnee

We buried a loop of copper tape into saw-cut trenches for a section of pews to provide T-Coil coverage to 50 people.

The rest of the church is covered via a wireless radio assisted listening

T-Coil (Telecoil) Loop Systems

St. Nicholas Church, Evanston

Loop wiring was installed under the wood sub-floor where signal was not near the musicians (north transept).

Because loops are a magnetic field, we must avoid any interference to microphones, guitar pickups and other magnetic transducers.
